

INDIANA DATA AND COMMUNICATIONS SYSTEM

COMMITTEE MEETING

June 5, 2001

The IDACS Committee met on Tuesday, June 5, 2001 at 10:30 a.m., at the Warren Township Library with the following members in attendance:

Captain Sam Messman (Acting Chairman for Major Fred Pryor)	
Deborah Cook	David Mollenkopf
Mike Dearing	D. Michael Paxton
Sheriff Tom Debaun	Cindy Snyder
Gerald Gagne	Harold Williams

Advisory members present:	Sergeant John Clawson
	Sergeant John Richards

Chairman Sam Messman called the meeting to order at 10:30 a.m., with a quorum.

OPENING COMMENTS

Chairman Messman stated he was Acting Chairman for Major Fred Pryor for today's meeting and welcomed the Committee and the audience.

CORRECTIONS/ADDITIONS TO MINUTES OF THE MARCH 6, 2001 MEETING

Cindy Snyder made a motion to approve the minutes of the last meeting, seconded by Mike Dearing. The motion passed unanimously.

OLD BUSINESS

Request for Indianapolis Regional Computer Center to Test Full Service Operators

Chairman Messman stated the matter has been reviewed and the decision made to grant the request. The testing, results, procedures, etc. will be monitored and the body reserves the right to rescind the granting of this request, should problems be detected.

Regional Computer Centers to Train and Test Agency Coordinators Behind Them

The recommendation has been for approval and this matter will come to vote. Mike Dearing made a motion to allow the Regional Computer Centers to test Agency Coordinators behind them. Harold Williams seconded the motion. Motion passed unanimously.

IDACS 2000 Upgrade

Chairman Messman updated the committee on the progress of IDACS 2000 Upgrade. The contract is moving along, inclusive of the RFP, the reply to written questions and answers between the vendor and the State, a standard State contract and a variety of items that appear as addendum. These items include timelines, responsibility between the vendor and the State, milestones in terms of accomplishments on the project for payment, partial payment to the vendor, etc. It is expected the contract will be on the signature trail going through the State's channels about the middle of June. A formal start date for the project has been identified as August 8th. The vendor has contacted their Bonding Company and to assure performance is purchasing a four million-dollar (\$ 4,000,000) bond.

Gerald Gagne asked if software would be available on or about that date? The Chairman answered that date is when the project is to begin, not for the software to be available. Next spring is a reasonable time to target for the use of the software. The federal mandate is to have it up and running and in production by July 1, 2002.

Michael Paxton added that network costs are going to increase, more than likely. Presently agencies are sharing lines in most cases and under the new paradigm this probably will not occur where you can share the costs with another agency. Negotiations are underway to keep the line costs to a minimum for agencies, so the suggestion is made to pad your budget to cover increased costs.

NEW BUSINESS

New Agencies/Additional Terminals

After receiving favorable recommendations from the System Security Officers and the System Coordinator, the following new terminal agencies and additional terminals have been approved. (See the enclosed attachments to the minutes).

Terminal Operators Approved

After receiving favorable recommendation from the System Coordinator, I approved four (4) IDACS operators with an arrest record. The decision was based on there being no felony convictions.

IDACS Coordinator Report

Mike Dearing stated the handouts given to the members today include a letter from CJIS dated April 6, 2001. Since there have been so many questions about running criminal history on taxicab drivers, etc., this can be used to show why criminal histories cannot be run. Mr. Dearing read part of the fourth (4th) paragraph starting with the second sentence as follows:

“In addition to authorizing FBI exchanges of CHRI with federally chartered or insured banking institutions, Pub. L. 92-184 provided statutory authority to disseminate FBI-maintained CHRI ‘for the purposes of employment and licensing if authorized by State statute and approved by the Attorney General.’ On November 29, 1972, Pub. L. 92-184 was superceded by Pub. L. 92-544, 86 Stat. 1115 (1972), which contains similar provisions and is still in effect. In the *Letter to All Fingerprint Contributors* dated January 20, 1972, the FBI announced the enactment of Pub. L. 92-184, including the requirement of a state statute approved by the Attorney General in order to access FBI-maintained CHRI.”

Basically this says if there is no state law, they are not allowed access through our system. It also has to be approved by the U.S. Attorney General.

This information can be obtained by submitting fingerprints to the FBI, but you must submit a request to get an ORI.

Mike Dearing informed that Central Records, through Access Indiana, has started a new program where businesses only, can get limited criminal history over the Internet, for a fee of twenty-two (\$22.00) dollars. There are some safeguards and if there is criminal history, the criminal history will be mailed, because if it was sent by e-mail, it could be changed. If there is no criminal history, it will be sent back immediately to them. Eventually this will be offered to the public.

IDACS Security Officer's Reports

Sgt. John Clawson stated he has issued three (3) Notice of Violations in the last quarter to the Scott County Sheriff, Jackson County Sheriff and Franklin Police Department. These were all due to entries not supported by written documentation.

Sgt. John Richards did not need to issue any Notice of Violations during this quarter.

AREA REPRESENTATIVE'S REPORTS

Area I Harold Williams had nothing to report except their next meeting would be held on June 19th at 10:00 a.m., held at the Hobart Police Department Annex, which is in South Lake shopping mall.

Area II Cindy Snyder reported they had a meeting May 25th, with twenty-eight (28) people present. The main problem discussed was the system going up and down and the delay in responses. The next meeting is August 30th at 10:00 a.m., Fort Wayne City Training Center.

Area III Gerald Gagne said they had a Spring meeting at Bloomington Police Department on April 17th with thirty-two (32) people present and Mike Dearing answered the questions that were asked.

Area IV

Deborah Cook reported a meeting was held on May 5th at Rushville Police Department with seventeen (17) in attendance. Ms. Cook gave them a short report on the last IDACS Committee meeting along with handing out copies of the Body Attachments. There was a discussion including IDACS terminal outage procedures, one agency representative made a complaint regarding the Data Operations Center and they were advised to contact Carrie Hampton. The IDACS System Coordinator, Security Officer and IDACS Trainer gave reports. There was a general discussion held about concerns for Dispatch Centers including IDACS audit procedures and she expressed concern over agencies not following IDACS policies and guidelines, including hit confirmations and requests, errors on entries, improper switched message structures and not using or understanding the ORION File as well as not having their IDACS Manual readily available for terminal operator use. The agencies were informed of the IDACS test-out choices and were urged to send operators to the three (3) day school. NCIC 2000 questions were asked regarding equipment purchases, etc.

Area V

David Mollenkopf said the Spring meeting was May 8th at the IPD Academy with twelve (12) in attendance. The IDACS staff was represented and there were no problems to bring before the Committee.

OTHER NEW BUSINESS

Chairman Messman addressed the subject of a moratorium of new agencies coming on-line at the present time. He stated that ISP has tried to improve communications between Washington and us by looking at the implementation of a TCP/IP communications protocol. The ISP staff has worked valiantly and through no fault of theirs, this will not happen. The software that is commercially available to us has not been developed to a level that is sufficient to our needs. Ours needs are specialized and are very sophisticated. We have been in communications with the most promising of the software houses, an IBM business partner, and they have not come through for us because we represent such a small market, it is not worth their time to put their labor and energy into satisfying our needs.

We still have in reserve, communications protocol that is better than what we have at present under the IBM design system architecture. There are some negotiations taking place to activate a second line with the FBI.

Michael Paxton explained the differences between TCP/IP and LU6.2, the two strongest choices. NCIC does not do network changes of this sort except once a month, coming up again July 1st. That is the time frame we are looking at, the basic scenario will be the same, four (4) sessions as opposed to one (1) and a faster communications rate. A lot of the work done for TCP/IP is still transferable to LU6.2. In the meantime, we are also working on a second bisync line at least to divide up the traffic, although not at a higher communications rate and see if the load can be more balanced.

After a discussion, Cindy Snyder made a motion, seconded by Deborah Cook that a moratorium be imposed, subject to review. Mike Dearing asked the motion to include "effective today, June 5, 2001, until the next Committee Meeting, September 4, 2001". Those requests that are already approved or are in the process of being approved and requests that are postmarked prior to June 5th will be processed.

Michael Paxton made a motion to amend the original motion to include, "a moratorium be imposed effective today, June 5, 2001 and those requests that are already approved or in the process of being approved and requests that are postmarked June 5, 2001 or earlier, will be processed. The moratorium will be until the next IDACS Committee meeting, September 4, 2001. At that time the Committee will decide whether to continue the moratorium or not". The motion was seconded by Harold Williams and passed with a unanimous vote.

GENERAL DISCUSSION

Harold Williams stated he attended the one (1) day review and test-out given by IDACS Instructor, Vivian Nowaczewski. In his opinion, it was excellent and highly recommended and is a good program.

Gerald Gagne also said he has had very favorable comments about Instructor Larry McRae and his presentation with the new program.

Mike Dearing said Deborah Cook had asked Major Pryor to contact the CTO in Ohio, which he did on April 4th regarding BMV changes that affected "out of state only". This will be given to the LEADS Administrator Programming Staff Supervisor. Ohio had made some changes to their BMV system and they did not realize the adverse affect that was happening outside the state. In state they did not have a problem.

Chairman Messman brought up the old issue of Body Attachments. It does stand that Body Attachments cannot be put in the system. The IDACS Committee did address and vote on this issue in December 1997. The legal opinion by ISP Attorney, Major Tony Sommer supports the non-entry.

AUDIENCE QUESTIONS/COMMENTS

Daniel Meno asked about a clarification regarding new terminals from existing agencies being added during the moratorium during the next three (3) months; are they included in the moratorium or just new agencies wanting to come on-line. Mike Dearing answered yes; it did include existing agencies, unless they are going from a dumb terminal to a PC.

ADJOURNMENT

There being no further questions or comments, the Chairman called adjournment to the meeting. **Next meeting will be Tuesday, September 4, 2001, (10:30 a.m.) at the Warren Township Library on East 21st Street.**

IDACS COMMITTEE MEETING - JUNE 5, 2001

New Agencies/Additional Terminals

After receiving favorable recommendations from the System Security Officer and the System Coordinator, the following new terminal agencies and additional terminals has been approved.

NEW TERMINAL AGENCIES

IN0460004 - LaPorte County Sheriff Jail Inquiry only (they will also be behind the LaPorte County RDC.)

Additional Terminals

IN0220001 - Floyd Co. Sheriff Communications
IN0270001 - Grant Co. Sheriff Communications
IN0270002 - Grant Co. Sheriff Communications
IN0270003 - Grant Co. Sheriff Jail Monitoring Room
IN0440003 - LaGrange Co. RDC Communications
IN0451301 - Dyer PD Communications
IN0460003 - LaPorte Co. RDC Communications
IN0520001 - Miami Co. Sheriff Communications
IN0530006 - Monroe Co. Sheriff - Records
IN0710005 - St. Joseph Co. Sheriff - Classification Office
IN0920101 - Columbia City PD - Dispatch
INISP1101 - ISP Toll Road - Dispatch
INISP3301 - ISP Bloomington - Dispatch
INISP3401 - ISP Jasper - Post Command
INISP4301 - ISP Seymour - Dispatch
